YOUVRAJ SINGH

Full-Stack Developer

Bengaluru, Karnataka, India | **(+91) 7869905752** | **youv2002@gmail.com**

Portfolio | LinkedIn | GitHub | LeetCode

Summary

Full-stack developer experienced across the **full software development lifecycle**: design, development, testing, and deployment. Work with **React, Next.js, Angular, Node.js, MongoDB, Supabase, PostgreSQL**, and **AWS**; daily **Git** user.

Skills

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, Java, Python, SQL
Frontend	React.js, Next.js, Angular, Redux Toolkit, TanStack Query, Tailwind CSS, Framer Motion
Backend	Node.js, Express.js, NestJS, RESTful APIs, Swagger, Passport.js, JWT, Zod, RBAC
Databases	MongoDB, Supabase, PostgreSQL, Mongoose
Cloud & Hosting	AWS (S3), Vercel, Render, Netlify
Tools	**Git**, GitHub, Postman, Figma, VS Code, Chrome DevTools

Experience

Software Development Intern — HASVIK Technologies *Remote, Jun 2026 – Present*

- Converted Figma designs into responsive, high-performance **Next.js** components and refactored client-side code, bringing page load time down by **25%**.
- Created **Figma designs** directly from client BRD documents for new features; the designs were reviewed and approved by the client before development began.
- Contributed to a **CRM migration** by building scalable REST APIs in **NestJS**, documenting and testing them with **Swagger**, and restructuring **PostgreSQL** schemas for better data consistency.
- Helped deploy and manage **AWS** resources for hosting and scaling team features, and worked in a **Git** workflow with code reviews from senior developers.

Projects

Instantly — AI Ecommerce Platform Live Demo

- Architected a full-stack e-commerce platform with **React, TypeScript, Node.js, and MongoDB**, using Zustand and TanStack Query for state and data fetching, and cutting client-side render time by **25%**.
- Integrated **Stripe Checkout** with signature-verified webhooks for card and cash-on-delivery orders, keeping checkout latency under **400ms**, with product images stored on **AWS S3**.
- Designed **scalable database schemas** and role-based access (**RBAC**) for user and admin panels, with Passport.js/JWT auth in HttpOnly cookies, improving server response time by around **30%**.
- Added **AI-assisted admin tools** using **Gemini** (Vercel AI SDK) to rewrite product titles and generate descriptions, and wrote integration tests for the API.

React 19 • TypeScript • Node.js • Express.js • MongoDB • Passport.js • JWT • Zustand • TanStack Query • AWS S3 • Stripe • Gemini • Zod • Render • Vercel

CarRental — Car Rental Platform Live Demo

- Developed a car rental platform with **14+ REST API endpoints** (React, Node.js, Express, MongoDB) covering listings, bookings, availability, and owner management.
- Added date-range validation to stop overlapping bookings, with separate **JWT**-secured access for users and owners along with bcrypt password hashing.
- Built an owner dashboard for managing cars, bookings, and revenue, and used **ImageKit** to auto-resize and compress vehicle images to 1280px WebP.

React.js • Node.js • Express.js • MongoDB • JWT • ImageKit • React Three Fiber • Tailwind CSS

QuickStay — Hotel Booking Platform Live Demo

- Engineered a hotel booking platform with React, Node.js, and MongoDB, using **Clerk** for guest authentication.
- Used **Cloudinary** for media uploads and NodeMailer to automatically send booking confirmation emails to guests.
- Built an admin dashboard for managing inventory and bookings in real time, which helped cut manual overhead by around **20%**.

React.js • Node.js • Express.js • MongoDB • Clerk • Cloudinary • Nodemailer • Tailwind CSS

Courses & Certifications

Workato Foundations | **Full Stack Development Bootcamp** (Udemy) | **Solana Bootcamp** (Rise In)

Education

Bachelor of Science in Computer Science 2020–2023

St. Aloysius College Jabalpur (RDVV University)
