YOUVRAJ SINGH

Full-Stack Developer · React, Next.js, Node.js, TypeScript, Python, PostgreSQL

Bengaluru, India (open to remote) · +91 78699 05752 · youv2002@gmail.com · youvraj-singh.vercel.app · github.com/Dumb4Codes · LinkedIn

SUMMARY

Full-stack JavaScript developer with three **live MERN applications** on GitHub and two internships shipping production web apps in **React, Node.js, Express, MongoDB and TypeScript**. I build reusable components and API-connected views, REST routes and controllers, and I care about what happens after launch: **934+ automated tests**, role-based access, code that passes review. Comfortable with Next.js, Git PR workflows, AWS and Docker.

SKILLS

Languages	**JavaScript (ES6+)**, **TypeScript**, Python, Java, SQL, HTML5, CSS3
Frontend	**React 19**, **Next.js**, Angular, Redux Toolkit, Zustand, Context API, TanStack Query, Tailwind CSS, shadcn/ui, Radix UI, Framer Motion, Recharts, Vite
Backend	**Node.js**, **Express.js**, NestJS, FastAPI, REST API design, JWT & Passport.js auth, RBAC, Zod & Pydantic validation, rate limiting, Swagger/OpenAPI
Database	**MongoDB** & **Mongoose** (schema design, indexes, aggregation, query optimisation), PostgreSQL, Supabase, Neon, Drizzle ORM
Integrations & APIs	Stripe (Checkout, webhooks), Clerk, Cloudinary, ImageKit, AWS S3 uploads, Nodemailer, Resend, Google Places, Gemini API via Vercel AI SDK
Testing & quality	Playwright, Vitest, pytest, axe-core accessibility checks, Chrome DevTools, Lighthouse, code review
Tooling & cloud	Git & GitHub (branching, pull requests), GitHub Actions, Docker, AWS, Vercel, Render, Netlify, Postman, Figma, VS Code
AI-assisted workflow	Claude Code, Cursor, GitHub Copilot, ChatGPT, Lovable: used daily for scaffolding, refactors and test generation, with every change reviewed and tested

EXPERIENCE

Full-Stack Developer Intern · SKOPE Kitchens — Bengaluru · Oct 2026 – Present

- Built and launched **three production web apps** as the sole developer at a cloud-kitchen startup, gathering requirements directly from the CEO and operations team.
- Delivered an **HR, attendance and payroll portal** (**Next.js, TypeScript, PostgreSQL**) used daily by 50+ staff, replacing a WhatsApp process; the first payroll matched the finance sheet **to the paisa**.
- Hardened a **React 19 + MongoDB** inventory platform for production: migrated it from Create React App to **Vite**, made all 11 screens work on phones, fixed a role-access bug with a route guard, and wrote a **464-check Playwright suite** that runs as each of 6 roles.
- Built a multi-stop **delivery platform** (Next.js, PostgreSQL): booking forms, dispatch desk, rider pages, live tracking; WCAG 2.2 AA with zero violations.
- Shipped with **JWT and session auth, RBAC for up to 6 roles, rate limiting, audit logs** and encrypted GitHub Actions backups; 934+ automated tests across the three apps.

Software Development Intern · HASVIK Technologies — Remote · Jun 2026 – Present

- Converted Figma designs into **reusable, responsive Next.js components** and refactored client-side code, **cutting page load time by 25%**.
- Built **REST APIs in NestJS** for a CRM migration, documented and tested with Swagger, and restructured PostgreSQL schemas for data consistency.
- **Git branching and pull-request workflow** with code review from senior engineers; co-managed AWS deployments.

MERN PROJECTS (ALL LIVE, CODE ON GITHUB)

Instantly · AI-assisted e-commerce store · Live · Code — *React 19, TypeScript, Node.js, Express, MongoDB, Stripe, AWS S3*

- Guest and signed-in carts: a persisted **Zustand** guest cart that **merges into the server cart on sign-in**; **TanStack Query** for server state, cutting client render time by 25%.
- **Stripe Checkout with signature-verified webhooks** as the only source of truth for "paid" (card and cash on delivery), checkout under 400 ms; verified-purchase reviews and order tracking.
- Thin Express controllers with business rules in **Zod**-validated services; **Passport.js JWT in HttpOnly cookies** with user/admin RBAC; redesigned **MongoDB schemas** and query paths for **~30% faster responses**.

CarRental · two-sided car rental platform · Live · Code — *React, Node.js, Express, MongoDB, JWT, ImageKit, Three.js*

- **14+ REST endpoints** for listings, bookings and availability with **date-range validation that refuses overlapping bookings**; separate JWT-secured access for customers and owners.
- Owner dashboard for cars, bookings and revenue; ImageKit auto-compresses photos to WebP.

QuickStay · hotel booking platform · Live · Code — *React, Node.js, Express, MongoDB, Clerk, Cloudinary, Nodemailer*

- Room search and filters, pay-online or pay-at-hotel booking, **Clerk auth**, Cloudinary uploads, confirmation emails; owner dashboard cut manual overhead ~20%.

Also on GitHub: Pulse (Next.js + Redux Toolkit), Smart Bookmark (Next.js + Supabase), FlowForge (node-based workflow editor).

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science · St. Aloysius College, Jabalpur (Rani Durgavati Vishwavidyalaya) — 2020 – 2023

The Complete Full-Stack Web Development Bootcamp (Udemy, Angela Yu) · The Web Developer Bootcamp (Udemy, Colt Steele) · Workato Foundations · Solana Bootcamp (Rise In)
