YOUVRAJ SINGH

Full-Stack Developer

Bengaluru, Karnataka, India | **+91 78699 05752** | **youv2002@gmail.com**

Portfolio | LinkedIn | GitHub | LeetCode

Summary

Full-stack developer who owns products end to end, from requirements and schema design to testing and deployment. Built **three live web apps from scratch** at a Bengaluru food-tech startup, including an HR and payroll portal used daily by **50+ staff**. Strong in **React, Next.js, TypeScript, Node.js, Python (FastAPI), PostgreSQL and MongoDB**.

Skills

Languages	JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3
Frontend	React.js, Next.js, Angular, Vite, Redux Toolkit, Zustand, TanStack Query, Tailwind CSS, shadcn/ui, Radix UI
Backend	Node.js, Express.js, NestJS, FastAPI, Swagger, Passport.js, JWT, Zod, Pydantic, RBAC
Databases	PostgreSQL, MongoDB, Supabase, Neon, Drizzle ORM, Mongoose
Testing & Cloud	Playwright, Vitest, pytest, axe-core, Docker, GitHub Actions, AWS (S3), Vercel, Render, Netlify
AI Tools	Claude Code, Cursor, GitHub Copilot, ChatGPT, Lovable, Google Antigravity, Gemini API, Vercel AI SDK
Tools	Git, GitHub, Postman, Figma, VS Code, Chrome DevTools

Experience

Full-Stack Developer Intern — Skope Kitchens *Bengaluru, Oct 2026 – Present*

- Built and launched **three full-stack web apps from scratch as the sole developer** at a multi-brand cloud-kitchen startup, gathering requirements directly from the CEO and operations team.
- Delivered an **HR, attendance and payroll portal** (Next.js, TypeScript, PostgreSQL) now **used daily by 50+ employees**, replacing a manual WhatsApp-based process; its payroll engine matched finance records **to the paisa**.
- Engineered a **kitchen inventory and food-cost platform** (React, FastAPI, MongoDB) on an immutable stock ledger, from procurement to daily closing; reconciled a month of real POS sales with an **exact match**.
- Prototyped a **multi-stop delivery platform** (Next.js, PostgreSQL) with booking, order tracking with rider photo updates and a dispatch desk, passing **WCAG 2.2 AA** checks with zero violations; **presented it directly to the CEO**.
- Migrated the inventory platform from Create React App to **Vite** and built all three apps **mobile-first** for staff and riders who work from their phones.
- Implemented **role-based access control** for up to 6 roles, JWT and session auth, rate limiting and audit logs, and shipped with **1,300+ automated tests** (Playwright, Vitest, pytest) and encrypted GitHub Actions backups.

Software Development Intern — HASVIK Technologies *Remote, Jun 2026 – Oct 2026*

- Converted Figma designs into responsive **Next.js** components and refactored client-side code, cutting page load time by **25%**; designed client-approved **Figma** screens directly from BRD documents.
- Contributed to a **CRM migration** by building REST APIs in **NestJS**, documenting and testing them with **Swagger**, and restructuring **PostgreSQL** schemas for better data consistency.
- Co-managed **AWS** deployments for team features, shipping through a Git workflow with senior code reviews.

Projects

Instantly — AI E-commerce Platform *React 19, TypeScript, Node.js, MongoDB, Stripe, AWS S3, Gemini* Live Demo

- Architected a full-stack store with Zustand and TanStack Query, cutting client render time by **25%**, and integrated **Stripe Checkout** with signature-verified webhooks for card and cash-on-delivery orders (**<400ms** checkout).
- Designed scalable MongoDB schemas that improved server response time by **~30%**, and secured user and admin panels with **RBAC** (Passport.js, JWT in HttpOnly cookies).
- Added **Gemini**-powered admin tools (Vercel AI SDK) that rewrite product titles and generate descriptions.

CarRental — Car Rental Platform *React, Node.js, Express, MongoDB, JWT, ImageKit, Three.js* Live Demo

- Developed **14+ REST endpoints** for listings, bookings and availability, with date-range validation that blocks overlapping bookings and separate JWT-secured access for users and owners.
- Built an owner dashboard for cars, bookings and revenue, with **ImageKit** auto-compressing vehicle images to WebP.

QuickStay — Hotel Booking Platform *React, Node.js, MongoDB, Clerk, Cloudinary, Nodemailer* Live Demo

- Engineered a hotel booking platform with **Clerk** authentication, **Cloudinary** media uploads and automated confirmation emails via Nodemailer.
- Built a real-time admin dashboard for room inventory and bookings that cut manual overhead by **~20%**.

Certifications & Education

Workato Foundations | **Full Stack Development Bootcamp** (Udemy) | **Solana Bootcamp** (Rise In)

B.Sc. Computer Science — St. Aloysius College, Jabalpur (Rani Durgavati Vishwavidyalaya) *2020 – 2023*
