YOUVRAJ SINGH

Full-Stack Developer

Bengaluru, Karnataka, India | (+91) 7869905752 | youv2002@gmail.com

Portfolio | LinkedIn | GitHub | LeetCode

CAREER OBJECTIVES

Full-stack developer with hands-on experience building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Passionate about designing modular backend systems, RESTful APIs, and maintainable software architectures while solving real-world engineering problems. Seeking an opportunity to contribute to high-impact products, continuously learn, and grow as a software engineer.

EDUCATION

Bachelor of Science in Computer Science
St. Aloysius College Jabalpur (RDVV University) *2020 - 2023*

Higher Secondary (PCM)
Kendriya Vidyalaya C.O.D. *2020*

SKILLS

Languages	:	**Java, JavaScript (ES6+), TypeScript, Python, Next.js, SQL**
Frontend	:	**React.js, Redux Toolkit, TanStack Query, HTML5, CSS3, Tailwind CSS, Framer Motion, React Three Fiber**
Backend	:	**Node.js, Express.js, RESTful APIs, Passport.js, JWT,Zod, Middleware, RBAC**
Database	:	**MongoDB, PostgreSQL, Mongoose**
Cloud & Services	:	**AWS S3, Stripe, Cloudinary, ImageKit, Clerk, Gemini, Nodemailer**
Tools & Workflow	:	**Git, GitHub, VS Code, Postman, Chrome DevTools, Vercel, Render, Netlify**

PROJECTS AND EXPERIENCE

Instantly — AI Ecommerce Platform

Live Project ↗

- Architected a scalable MERN application using layered architecture, service-oriented modules, and reusable component composition to improve maintainability and separation of concerns.
- Engineered secure authentication, RBAC, request validation, and middleware-driven API workflows using Passport.js, JWT, HttpOnly cookies, and Zod.
- Designed scalable domain models, transactional business logic, and consistent data persistence through MongoDB, Mongoose, and service-layer abstractions.
- Integrated Stripe webhooks, AWS S3, and Gemini AI through asynchronous event-driven workflows while preserving modularity across application boundaries.

React 19 • TypeScript • Node.js • Express.js • MongoDB • Passport.js • JWT • Zustand • TanStack Query • AWS S3 • Stripe • Gemini • Zod • Tailwind CSS

CarRental — Car Rental Platform

Live Project ↗

- Developed a modular full-stack application with layered backend architecture, reusable frontend composition, and RESTful API design.
- Engineered authentication, RBAC, middleware-driven authorization, and reservation orchestration with validation across the request lifecycle.
- Modeled scalable MongoDB schemas and encapsulated business rules through service-oriented abstractions and data validation pipelines.
- Integrated ImageKit CDN and React Three Fiber into the rendering pipeline to optimize media delivery and interactive 3D visualization.

Node.js • Express.js • MongoDB • ImageKit • React Three Fiber • Framer Motion • Tailwind CSS

QuickStay — Hotel Booking Platform

Live Project ↗

- Built a modular MERN application following layered architecture with reusable frontend components and service-oriented backend modules.
- Implemented authentication, RBAC, schema validation, booking orchestration, and middleware-driven request processing across RESTful services.
- Engineered webhook-driven payment processing, asynchronous event handling, and third-party infrastructure integration using Stripe, Cloudinary, and Nodemailer.
- Optimized domain modeling, API communication, and document relationships to improve scalability and maintainability across application layers.

React.js • Node.js • Express.js • MongoDB • Clerk • Stripe • Cloudinary • Nodemailer • Tailwind CSS
