Career Objectives

Full-stack developer specializing in the MERN stack with hands-on experience building scalable and user-centric web applications. Skilled in developing responsive frontend interfaces and efficient backend APIs, with a strong focus on clean architecture, performance, and real-world problem solving. Seeking to contribute to impactful projects while continuously growing as a developer.

Education

Bachelor of Science (C.S.) — *2020 - 2023*
St. Aloysius College Jabalpur (RDVV University)

Higher Secondary (PCM) — *2020*
Kendriya Vidyalaya C.O.D.

Courses and Certifications

- The Web Developer Bootcamp 2025 – Colt Steele (Udemy) · Certificate↗
- Full Stack Web Development Bootcamp 2025 – Dr. Angela Yu (Udemy) · Certificate↗
- Solana Bootcamp – Rise.in · Certificate↗

Skills

- **Web Development:** HTML5, CSS3, JavaScript (ES6+), Typescript Python, Java, React.js, FastAPI , Tailwind CSS, Bootstrap, Spring Boot, Spring Data JPA, Node.js, Express.js, SQL, PostgreSQL, Responsive Design, Framer Motion
- **UI/UX Design:** Figma, Wireframing, Prototyping, Design Systems, User-Centered Design
- **Tools & Workflow:** Git, GitHub, VS Code, Chrome DevTools, Postman, Vercel Hosting, Netlify, Render
- **Other Skills:** Cross-Browser Compatibility, Performance Optimization, Team Collaboration, PowerBI

Projects and Experience

Car Rental Platform | Web Development | Live Project↗

- Designed and implemented a complete car rental workflow with separate user and owner roles, enabling car listing, search, and booking management.
- Developed a booking system with date-overlap validation logic to prevent double bookings and ensure accurate availability handling.
- Built secure authentication and role-based authorization to protect routes and restrict actions based on user roles.
- Enhanced user experience by integrating an interactive 3D model, improving visual engagement and interactivity.
- **Tech Stack:** ***React.js, Tailwind CSS, Node.js, Express, MongoDB, ImageKit, GitHub, Framer Motion, Vercel***

QuickStay (Hotel Booking & management site) | Web Development | Live Project↗

- Built a full-stack hotel booking platform with 8+ pages and role-based access using React, Node.js, and MongoDB.
- Developed 10+ REST APIs with authentication (Clerk + JWT) for bookings, rooms, and user management.
- Implemented booking system with date validation, price calculation, and Stripe payment integration.
- Integrated Cloudinary (image uploads) and Nodemailer (email confirmations) with structured MongoDB models.
- Added search filters and owner dashboard analytics to track bookings and revenue.
- **Tech Stack:** ***React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Clerk, Cloudinary, Stripe, Nodemailer, Vercel***

Speed Typing (Typing Game) | Web Development | Live Project↗

- Built a real-time typing test application using React and TypeScript with modular architecture using custom hooks.
- Implemented a character-level rendering system to accurately track user input and fix line-wrapping alignment issues.
- Designed a clean, responsive UI with custom theming using CSS variables and optimized typography for readability.
- Developed live performance metrics including WPM, accuracy, and mistake tracking with efficient state management.
- **Tech Stack: React (TypeScript), Vite, Tailwind CSS + CSS Variables (Theming), Framer Motion, Custom Hooks**
